

Practical No.4

Execute the MDX queries to extract the data from the datawarehouse(Cube).

MDX Query

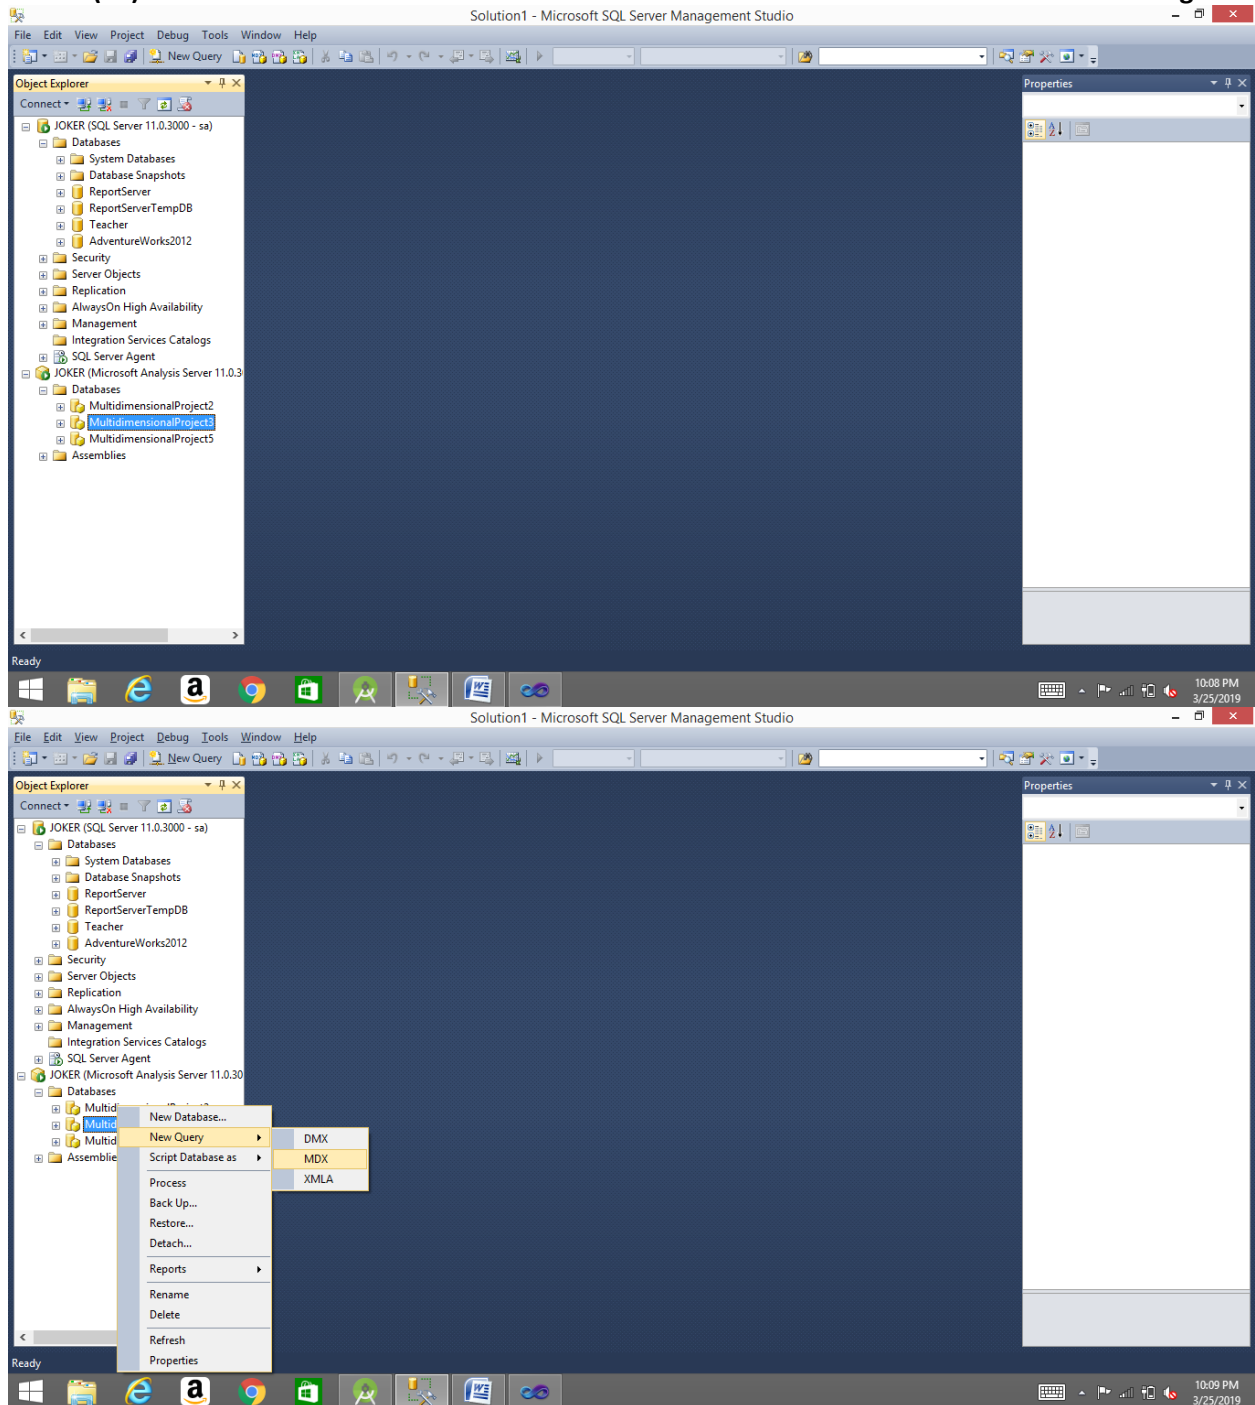

Multidimensional Expressions (**MDX**) is a **query** language for online analytical processing (OLAP) using a database management system.

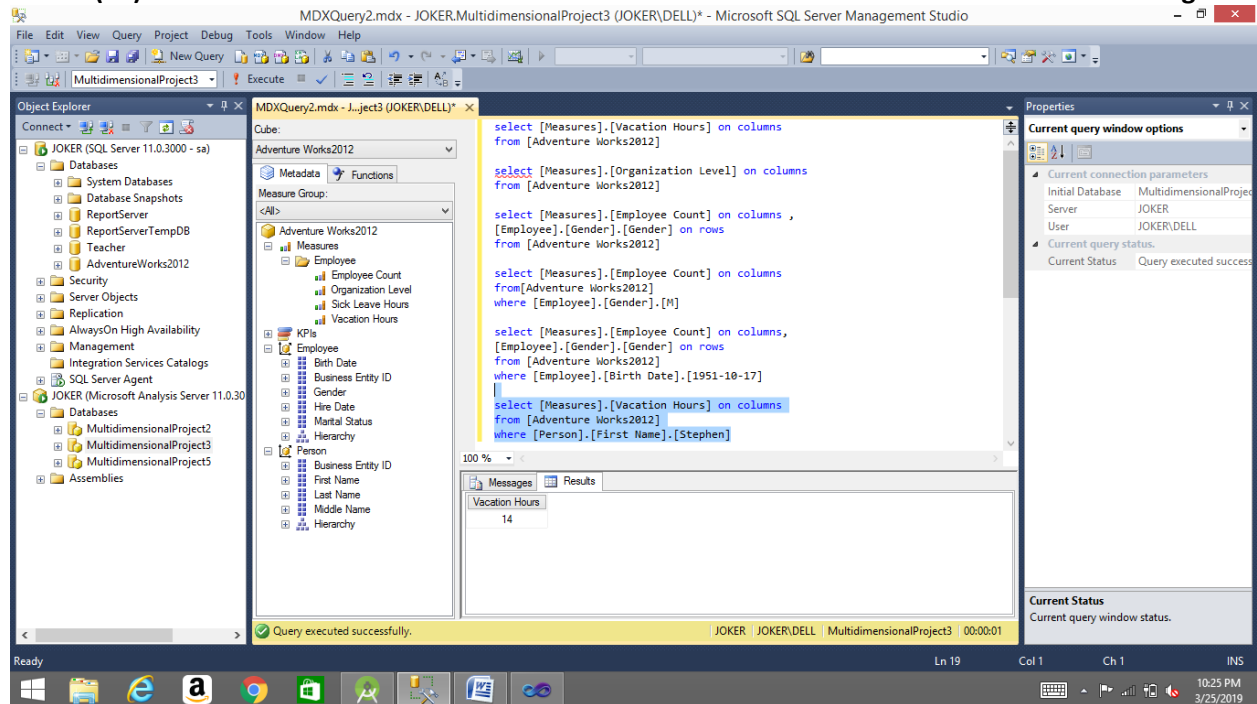

Much like SQL, it is a **query** language for OLAP cubes. It is also a calculation language, with syntax similar to spreadsheet formulas

To execute MDX queries, we to login in SQL Management Studio with analysis service.

Some MDX Queries

```

select[Measures].[Organization level] on columns
from [Adventure Works2012]
  
```

```

select[Measures].[Employee Count] on columns
from [Adventure Works2012]
  
```

```

select[Measures].[Vacation Hours] on columns
from [Adventure Works2012]
  
```

```

select[Measures].[Employee Count] on columns,
[Employee].[Gender].[Gender] on rows
from [Adventure Works2012]
  
```

```

select[Measures].[Employee Count] on columns
from [Adventure Works2012]
where [Employee].[Gender].F
  
```

```

select[Measures].[Employee Count] on columns
from [Adventure Works2012]
where [Employee].[Gender].M
  
```

```

select[Measures].[Employee Count] on columns,
[Employee].[Gender].[Gender] on rows
from [Adventure Works2012]
where [Employee].[Birth Date].[1951-10-17]]
  
```

```

select[Measures].[Vacation Hours] on columns
from [Adventure Works2012]
where [Person].[First Name].[Stephen]
  
```

```
select [Measures].[Employee Count] on columns
from [Adventure Works2012]

select [Measures].[Organization Level] on columns
from [Adventure Works2012]

select [Measures].[Sick Leave Hours] on columns
from [Adventure Works2012];

select [Measures].[Vacation Hours] on columns
from [Adventure Works2012]

select [Measures].[Vacation Hours] on columns
, [Employee].[Gender].[Gender] on rows
from [Adventure Works2012]

select [Measures].[Vacation Hours] on columns
, [Employee].[Marital Status].[Marital Status] on rows
from [Adventure Works2012]

select [Measures].[Vacation Hours] on columns
, NONEMPTY({ [Employee].[Gender].[Gender]}) on rows
from [Adventure Works2012]

select [Measures].[Employee Count] on columns
from [Adventure Works2012]
where [Employee].[Gender].[Gender].&[M]

select [Measures].[Employee Count] on columns
from [Adventure Works2012]
where [Employee].[Gender].[Gender].&[F]

select [Measures].[Employee Count] on columns
from [Adventure Works2012]
where [Employee].[Marital Status].&[S]

select [Measures].[Employee Count] on columns
from [Adventure Works2012]
where [Employee].[Marital Status].&[M]

select [Measures].[Employee Count] on columns
, [Employee].[Marital Status] on rows
from [Adventure Works2012]
```
